

Basic Wall Mount

The Basic Wall Mount Series allows for a simple and safe means of connecting either a portable generator or a load bank to an existing generator, ATS, or utility service with 16 Series Cam only connection points.

Standard Features:

- NEMA 3RX aluminum construction with quarter-turn latches and powder-coated finish
- Completely sealed when not in use
- Tamper-resistant while in use via cable slots and pad-lockable latches
- Standard phase rotation monitor
- Color-coded 16 Series Cam input/output connectors
- Color matching and printed 16 Series Cam feeder cable assemblies
