

Power Temp Systems' portable line of equipment is a dependable, affordable solution for situations where power is of critical importance.

## Standard Features:

- Combines the generator main controller, voltage regulator, battery charger, and engine speed controller (for non-ECM controlled engines) into one, easy to install control cabinet.
- Deep Sea 8610 Synchronizing & Load Sharing Controller comes standard
- Standard grey NEMA powder-coated aluminum construction
- Size ranges from 600 to 3000A
- Custom T-slot output buss w/smart lugs for hardwire and Series 16 Cam-Loks™ for quick connect wire access
- Multiple voltages
- Shore power inlets for powering up engine block heater, battery charger, etc.

## Optional Features:

- G8 series Deep Sea controller for advanced parallel applications
- Deep Sea 7310/20 & 7410/20 for non-parallel and/or standalone applications
- Alternative controllers available upon customer request (i.e., Com-ap, Basler, Deif, etc.)
- Available fuel transfer pump circuitry for generators with external fuel tank connections (controller can keep internal fuel tank between 20% & 80% full automatically for prime power applications)
- Custom color enclosure upon request
