

Why Power Temp Systems?

Power Temp Systems, Inc has been delivering energy through standard and customized portable and permanent power distribution products since 1991. Represented nationwide, we provide a robust support team and innovative solutions with favorable lead times. Our innovation and can-do approach to any challenge have led to the development of patented advancements that are quickly becoming the industry standard.

As a supplier of specialized built-to-order portable electrical products, we developed a complete line of standard power distribution products such as portable transformers, automatic transfer switches, I-Line panels, paralleling panels, spider boxes, and other equipment using the latest technology.

Our products are...

- Safe, reliable, and user friendly
- Rugged and durable
- NEC and OSHA compliant
- UL 1640 compliant

Portable Power Distribution

Power Temp Systems, Inc. | Portable Power Distribution Equipment

30+ Years Ensuring 24/7 Reliable Power

1 Paralleling Panel

These panels offer a way to safely and seamlessly connect multiple portable generators. Each set of generator input cam-loks has its own circuit breaker/safety disconnect. Additionally, these panels have both cam-lock outputs and hardwire connections. Power Temp Systems provides paralleling panels ranging from 400 - 6000 Amp.

2 Transformer

Available in 10 - 2500 kVA, our portable step-up and step-down transformers are industrial-grade units that provide a reliable source of electricity for nearly any project. These devices are designed for sites where an existing voltage needs to be either reduced, increased, or cleaned to provide electrical power to various equipment.

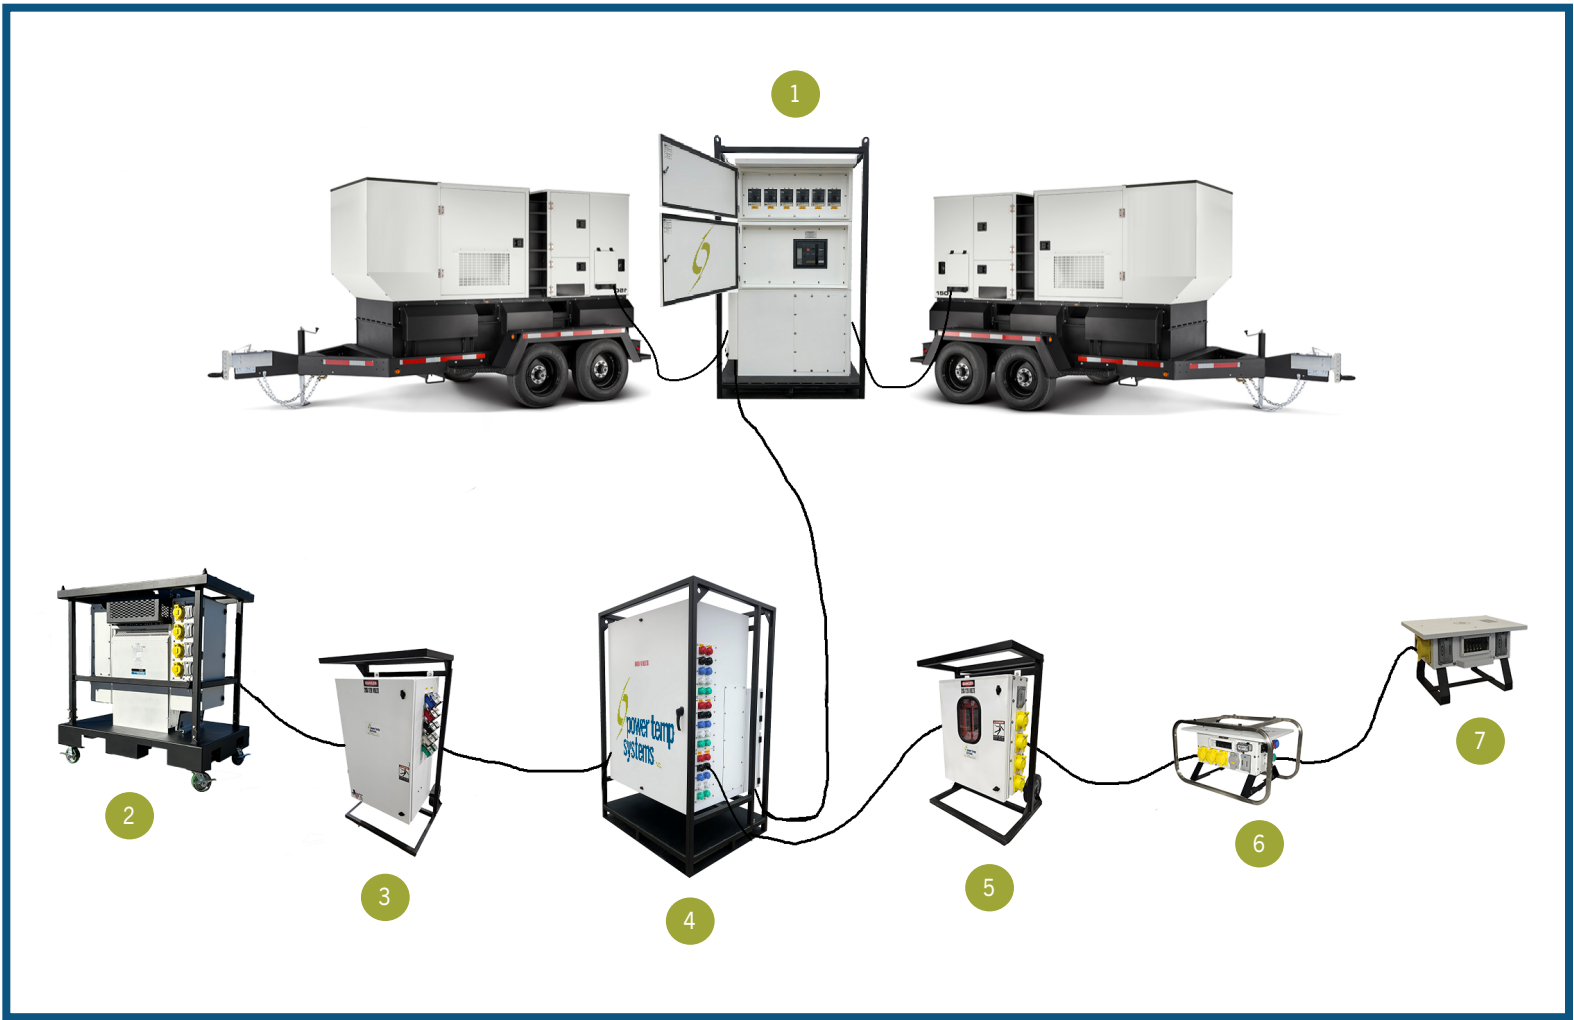

3 Automatic Transfer Switch

Known as the first of its kind with built-in automatic voltage sensing technology, this technology automatically detects which voltage is running into the panel and then selects the appropriate control parameters guaranteeing the controller will always be supplied with the correct voltage. These range from 200 - 4000 Amp.

U.S. Designed & Patented Equipment

4 I-Line Panel

Offered in both standard configurations and customizable options, our panelboards provide the flexibility and convenience needed for various electrical distribution needs. The Square D distribution panel system enables easy addition and removal of circuit breakers in the field, ensuring a perfect fit for your specific application.

Reputable Nationwide Sales Network

5 Power Distribution Panel

These panels provide a safe way to distribute power to tools and other equipment that require power on a job site or other locations where utility power is not available or turned off. The compact design, with the addition of two tires, allows for quick and easy relocation around a job site. Our panels come in sizes ranging from 60 - 400 Amp.

6 Power Qube

The Power Qube serves as a compact and efficient power distribution solution, suitable for various environments. With 100 - 400 Amp configurations and customizable options, the stackable, portable power distribution boxes with powder-coated aluminum or high-impact, resistant, molded, weatherproof rubber enclosures offer versatility and convenience for compact power needs.

7 Spider Box

Our heavy-duty, 50 Amp spider boxes are available in three different standard configurations, suitable for various applications. These units are engineered with non-corrosive, aluminum, powder-coated enclosures and offered with either GFCI duplexes or with GFCI breakers.
